SUMMARY

Senior Data Analyst with 12+ years of experience in building **reports and models** across industries like healthcare, **fintech**, e-com & media domains. Experienced in end-to-end development of ML models, **DAX queries, Data Warehouses**, and **data governance** frameworks. Over the years, I have built and scaled AI-driven products to 400K+ users, including solutions like predictive and marketing models. I am experienced in bridging business strategy with practical **AI implementation** driving **customer segmentation**, **Churn Prediction,** reducing marketing spend, and improving customer retention..

KEY HIGHLIGHT

- **Zero-to-One Builder**: Launched 2 successful fintech platforms and **AI-powered healthcare** products in MENA region and scaled to 400K+ users with $2M+ MRR.
- **Analytics Team**: Built the analytics infrastructure of two business startups, designing the business KPIs & building the reporting infrastructure for the different stakeholders.
- **AI-Driven Business Impact**: Designed AI and ML solutions for fraud detection, customer segmentation, and revenue optimization, improving conversion, retention, and operational efficiency.

SKILLS

- **Data Analytics & Data Visualization:** Power BI, Microsoft BI Stack, DAX, Power Query (M Language), Tableau, Celonis
- **Data Engineering & Databases:** Data Modeling, Data Warehousing, ADLS, ETL, Azure Synapse, Azure Databricks, SQL, MS Fabric
- **loud Platforms:** Azure, AWS Cloud, GCP, **Azure Databricks**
- **Tools & Technologies:** Git, SQL query, Python, Spark, Power BI Gateways, CI/CD, Google Analytics
- **AI/ML Algorithms:** Classification, Regression, Clustering, Random Forest, XGBoost.
- **Libraries:** Pandas, Scikit-learn, PyTorch, Hugging Face Transformers.
- **Generative AI & LLMs:** RAG, Multi-Agent System, **LLM Fine tuning**
- Business Analytics, Data Analysis, Data Manipulation, Performance Tracking, Process Documentation, Process Improvement

WORK EXPERIENCE

Nyukt.AI - (contract) Senior Data Analytics — **Dubai** September 2025 – Present

- Served as the **primary interface** between business stakeholders and the program managers, managed **multi-country operations**, leading a cross-functional **team of 7+** to deliver high-value BI solutions.
- Delivered **~$330K annually in infrastructure costs savings** by optimizing the Azure Databricks setup and simplifying calculation logic to make queries faster and more efficient.
- Utilized Python for data analysis and **Power BI data modeling** and **DAX** optimization, significantly reducing manual effort by 50% and enhancing delivery of reports.
- Worked closely with engineering teams to design scalable data structures, **automating 90+ complex reports** and managing **40+ high-usage production tables** to support real-time analytics.
- Created a Data Warehouse on **Azure Databricks**, optimized **SQL-based data pipelines**, and implemented **Row-Level Security (RLS)** for secure, multi-level data access, adhering to industry standards.
- Optimized complex data pipelines using SQL Server and connecting database, improving data processing efficiency by 30% and enabling faster delivery of business insights.
- Worked closely with marketing, **Sales & Operations**, finance and product teams to align dashboards with organizational KPIs, ensuring data quality, governance, and scalability of BI solutions across global operations.

Robustrade DMCC - Fintech (contract) BI Manager — **Dubai** October 2024 – August 2025

- Successfully launched mobile money solution in Africa & achieved a **user base of 400K & achieved an MRR of 2M USD**.
- Partnered with **Ecobank** to integrate fintech payment systems across African market and built automated reporting for mobile money transactions & merchant settlements for operations.
- Designed ML-driven customer segmentation and CLV model, using **marketing mix modelling (MMM**) insights to optimize acquisition and retention strategies, resulting in a 15% increase in retention and a **20% reduction in CAC**.
- Drove analytical **adoption** and self-service reporting by standardizing **60+ reports into 25+** streamlined executive dashboards, utilizing reusable **semantic models** and visualization best practices
- Developed Azure-based data pipelines integrated with **MS Fabric**, implementing star schema and created self-service tables to support multi-country, multi-timezone, and multi-currency analytics.
- Managed the **Power BI** Service ecosystem by implementing incremental refreshes and workspace governance to ensure optimal performance for large datasets.
- Built a robust **Data Warehouse** using **Azure Databricks** and SQL, establishing a single source of truth across different business units in Africa and the UAE.

- Led the implementation of structured data models (**Star Schema**) for key data pipelines, improving data accuracy, reducing duplication, and enhancing data processing efficiency for reporting and analytics
- Leveraged the **Customer Data Platform (CDP) like MoEngage** to create customer segments and deliver targeted app push notifications (APN) to the right audience
- Ensured data governance practices complied with regional data protection regulations across African markets by developing and enforcing data handling and privacy protocols.

TruKKer (MoXey Fintech) Data Analytics Manager **Dubai** October 2022 – September 2024

- Built the analytics infrastructure for a fintech platform in UAE & KSA, supporting its scale to ARR of 100M AED.
- Built financial reporting for the **Arab Bank** prepaid card program, tracking key metrics like card usage, interchange revenue, and driver spending behavior.
- Built data pipeline with golden dataset design, star schema, and MS Fabric data flows, reducing data inaccuracies **by 80%.**
- Built a robust **Data Warehouse** using Azure Databricks and SQL, establishing a single source of truth across different business units in Africa and the UAE.
- Designed and ML-based **prediction model** (XGBoost, Random Forest), reducing fraud cases by 20% across Middle East markets.
- Built **K-Means clustering model** to identify high-value customer segments from transactional data, enabling more effective targeted marketing strategies.
- Developed **RFM models** and performed customer profiling based on transactional behavior & App engagement.
- Built **Power BI dashboards** and the entire reporting structure for MoXey from scratch & ensured data privacy and security are followed on the regulatory frameworks of UAE and KSA.
- Utilized **SQL and DAX queries** in Power BI Desktop to create dashboards both in the cloud and on-premise.

ASIANET NEWS NETWORK - Senior Manager **India** May 2017 - September 2022

- Managing User & Traffic growth for all the 7 channels at Asianet News with 1B+ PV's & 90M+ MAU's.
- Managed user and traffic growth for all 7 channels at Asianet News, achieving over 1B+ Page Views (PVs) and 90M+ Monthly Active Users (MAUs).
- Experience in digital and media planning, campaign optimization, tracking, and analysis
- Built unique audience profiles using Audience Manager for sales teams to identify their most valuable segments and utilize them across any digital channel.

HINDUSTAN TIMES - Strategy & Ops **India** July 2016 - April 2017

- Reported directly to the CEO, collaborating with product owners & stakeholders to expand the FM Radio category across PAN India.
- Periodic MIS reporting to CEO, Performance Presentations. Interfacing with Selected Clients, Budgeting, handling special situations among other responsibilities.

INDIAMART - Category Manager **India May** 2015 - Jul 2016

- Worked directly with senior management and key stakeholders, including the CEO, to expand the Business of the Tool category unit of IndiaMart into the B2B market, with an emphasis on aggressive expansion into the SME segment.
- Provided periodic MIS reporting to the CEO, prepared performance presentations, interfaced with selected clients, managed budgeting, and handled special situations.

ADITYA BIRLA GROUP Senior Engineer **India July** 2011 - Apr 2014

- As part of the procurement team, developed the concept of an Integrated Vendor Experience Centre, which reduced merchant onboarding complexities, centralized ordering, and improved auditing.
- Handled the onboarding of over 200+ vendors within two months for material supply.
- Streamlined the procurement process for equipment, reducing man-hours from 120 to 25 hours.
- Trained 101 Project Affected People (PAPs) on the basic structure of pot production processes within three months.

EDUCATION

MBA, Operations and Strategy | Great Lakes Institute of Management | 2015 | 3/4 (Deans List)

Bachelor of Engineering |VSSUT, Burla – India | 2011 | 80%
